

Tree & Shrub Care

1. Water every other day for the first week.
2. After the first week, water weekly being sure to soak the entire ball area of the trees and shrubs.
3. Trim any broken or dead branches.
4. After the first month, apply a small amount of 10-6-4 fertilizer around the perimeter of your plant material. Use amount specified according to the instructions that come on the bag.
5. If stakes appear loose, drive further into ground. Readjust as necessary.
6. Pull stakes and cut guides off after one year.
